### **DETAILED ACTION**

1. This office action is in response to the amendment filed November 15, 2006.

# Response to Arguments

2. Applicant's arguments with respect to claims 12, 13 and 22 have been considered but are most in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoon et al. (U.S. Patent No. 7,098,594).

In regards to claim 12, Yoon et al. ("Yoon") discloses the following:

- a) a front substrate (22) having a first pattern comprising at least one line segment installed on the predetermined assembling position (For Example: See Figure 1); and
- b) a rear substrate (20) having a second pattern comprising at least one hexagonal honeycomb pattern formed with rib barriers installed on the predetermined assembling position thereof, wherein the projection of the line segment is substantially parallel to at least one side of the hexagonal honeycomb pattern with a predetermined distance therebetween (For Example: See Figure 1).

In regards to claim 13, Yoon discloses the following:

a) the first pattern comprises a plurality of parallel line segments (For Example: See Figure 1).

Application/Control Number: 10/797,867 Page 3

Art Unit: 2822

## Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoon et al. (U.S. Patent No. 7,098,594) in view of Boo et al. (Korean Publication No. 2002019353).

In regards to claim 22, Yoon fails to disclose the following:

a) the first pattern installed on the front substrate comprises non-transparent bus electrode material or black matrix material.

However, Boo et al. ("Boo") discloses a semiconductor device that has a first pattern installed on the front substrate (10) comprises non-transparent bus electrode material (13) or black matrix material (For Example: See Abstract). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the semiconductor of Yoon to include a first pattern installed on the front substrate that comprises a non-transparent bus electrode material or black matrix material as disclosed in Boo because it aids in providing a discharge sustain function (For Example: See Abstract).

Additionally, since Yoon and Boo are both from the same field of endeavor, the purpose disclosed by Boo would have been recognized in the pertinent art of Yoon.

Application/Control Number: 10/797,867

Art Unit: 2822

### Conclusion

Page 4

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica Lewis whose telephone number is 571-272-1838. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on 571-272-2429. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300 for regular and after final communications.
